# BLUE MIRROR

# Autonomous PPE Training

bluemirror.ai

# Digital
# PPE Instructor

**Blue Mirror** provides a PPE Instructor on a tablet, enabling you to provide great PPE training coverage to all departments, freeing up specialist resources to focus on more fundamental activities.

Using cutting edge computer vision AI technology, the hands-free system keeps healthcare workers and patients safer by completing the PPE training.

## Benefits:

- Interactive - It is not a video or slides, this mirror sees you and reacts to your gestures in real-time.
- Customise with your PPE protocols and your way of practising PPE
- Touchless interaction - Blue Mirror uses voice commands and the tablet's camera to interact with the user without requiring physical contact
- Improves compliance, confidence and sense of safety

**Blue Mirror** operates like a digital mirror that talks to the user, guiding them step by step. While the user executes the protocol, Blue Mirror detects errors and notifies the user in real-time, with voice and visual cues.
